Vehicle Valuation Methodology Explanation

WorkCenter Total Loss ("WCTL") was designed and built by Mitchell International, Inc. in conjunction with J.D. Power, which is an expert in data analysis with years of experience in vehicle pricing. WCTL provides a consistent methodology across vehicle makes and models for estimating the value of a vehicle. The WCTL analysis is based on comparable vehicles that most closely resemble the loss vehicle, with certain adjustments to both the comparable vehicle and loss vehicle depending on the facts of a particular claim.

WCTL produces accurate and easy-to-understand vehicle valuations via a five-step process:

Step 1 - Locate Comparable Vehicles

Locate vehicles from WCTL's comparable vehicle database that are the closest match to the loss vehicle in the same market area. These are not intended to be replacement vehicles and may no longer be listed for sale. The comparable vehicle database includes millions of vehicles listed for sale on publicly available websites (for example, cars.com and autotrader.com), as well as sold vehicle records (where available).

Step 2 - Adjust Comparable Vehicles

Make adjustments to the prices of the comparable vehicles. There are several types of comparable vehicle adjustments, including:

- Mileage Adjustment – an adjustment for differences in mileage between the comparable vehicle and the loss vehicle.
- Equipment Adjustment – an adjustment for differences in equipment between the comparable vehicle and the loss vehicle (for example, differences in equipment packages and options).

Step 3 - Calculate Base Vehicle Value

Calculate the base vehicle value by averaging the adjusted prices of the comparable vehicles.

Step 4 - Calculate Loss Vehicle Adjustments

There are four types of loss vehicle adjustments:

- Condition Adjustment – an adjustment to account for the condition of the loss vehicle at the time of the loss.
- Prior Damage Adjustment – an adjustment to account for any prior damage present on the loss vehicle at the time of the loss.
- After Market Part Adjustment – an adjustment to account for any aftermarket parts present on the loss vehicle at the time of the loss.
- Refurbishment Adjustment – an adjustment to account for any refurbishment performed on the loss vehicle at the time of the loss.

Step 5 - Calculate the Market Value

The Market Value is calculated by applying the loss vehicle adjustments to the base value.

For your protection California law requires the following to appear on this form. Any person who knowingly presents false or fraudulent claim for the payment of a loss is guilty of a crime and may be subject to fines and confinement in state prison. False representations made on a signed auto theft claim form subject the insured to a penalty of perjury.
