## VALUATION METHODOLOGY

### How was the valuation determined?

#### CLAIM INSPECTION

STATE FARM INSURANCE COMPANIES has provided CCC with the zip code where the loss vehicle is garaged, loss vehicle VIN, mileage, equipment, as well as loss vehicle condition, which is used to assist in determining the value of the loss vehicle.

#### DATABASE REVIEW

CCC maintains an extensive database of vehicles that currently are or recently were available for sale in the U.S. This database includes vehicles that CCC employees have physically inspected, as well as vehicles advertised for sale by dealerships or private parties. All of these sources are updated regularly.

#### SEARCH FOR COMPARABLES

When a valuation is created the database is searched and comparable vehicles in the area are selected. The zip code where the loss vehicle is garaged determines the starting point for the search. Comparable vehicles are similar to the loss vehicle based on relevant factors.

#### CALCULATE BASE VEHICLE VALUE

Adjustments to the price of the selected comparable vehicles are made to reflect differences in vehicle attributes, including mileage and options. Dollar adjustments are based upon market research.

Finally, the Base Vehicle Value is the weighted average of the adjusted values of the comparable vehicles based on the following factors:

- Source of the data (such as inspected versus advertised)
- Similarity (such as equipment, mileage, and year)
- Proximity to the loss vehicle's primary garage location
- Recency of information

## SUPPLEMENTAL INFORMATION

### NHTSA VEHICLE RECALL

**NHTSA Campaign ID :** 13V115000

**Mfg's Report Date :** APR 01, 2013

**Component :** AIR BAGS , STRUCTURE

**Potential Number Of Units Affected :** 186,250

**Summary :** Hyundai Motor Company is recalling certain model year 2011-2013 Elantra vehicles manufactured from November 12, 2010, through March 5, 2013. A support bracket attached to the headliner may become displaced during a side curtain airbag deployment.

**Consequence :** If the headliner support bracket makes contact with an occupant during a crash, it may cause a laceration injury.

**Remedy :** Hyundai will notify owners, and dealers will apply adhesive strips to the headliner, free of charge. The safety recall began during April 2013. Owners may contact Hyundai at 1-800-633-5151. Hyundai's recall campaign number is 109.

**Notes :** Owners may also contact the National Highway Traffic Safety Administration Vehicle Safety Hotline at 1-888-327-4236 (TTY 1-800-424-9153), or go to [www.safercar.gov](http://www.safercar.gov).

The National Highway Traffic Safety Administration has issued 4 safety related recall notices that may apply to the above valued vehicle.

---

**NHTSA Campaign ID :** 16V574000

**Mfg's Report Date :** AUG 02, 2016

**Component :** SERVICE BRAKES, HYDRAULIC

**Potential Number Of Units Affected :** 64,500

**Summary :** Hyundai Motor America (Hyundai) is recalling certain model 2013 Elantra vehicles manufactured December 1, 2012, to April 30, 2013. The brake pedal stopper pad can deteriorate allowing the brake light switch plunger to remain extended when the brake pedal is released.

**Consequence :** If the brake light switch plunger does not retract as it should when the brake pedal is not being pressed, the brake lights may stay illuminated preventing accurate communication to following vehicles that the vehicle is slowing or stopping. Additionally, if the brake switch plunger is not retracted, then the transmission can be shifted out of PARK without depressing the brake pedal. Either condition increases the risk of a crash.

**Remedy :** Hyundai will notify owners, and dealers will replace the brake pedal stopper pad with an improved part, free of charge. The recall is expected to begin on September 30, 2016. Owners may contact Hyundai customer service at 1-855-371-9460. Hyundai's number for this recall is 146.

---

**NHTSA Campaign ID :** 17V769000

## SUPPLEMENTAL INFORMATION

**Potential Number Of Units Affected :** 390,467

**Summary :** Hyundai Motor Company (Hyundai) is recalling certain 2013-2014 Elantra sedan, coupe and GT vehicles. The brake pedal stopper pad can deteriorate allowing the brake light switch plunger to remain extended when the brake pedal is released. This will allow the brake lights to remain illuminated continuously. It can also allow the shift lever to be moved without depressing the brake pedal, or activate the engine management brake pedal override feature.

**Remedy :** Hyundai will notify owners, and dealers will replace the brake pedal stopper pad, free of charge. The recall is expected to begin February 8, 2018. Owners may contact Hyundai customer service at 1-800-633-5151. Hyundai's number for this recall is 170. This campaign expands recall 16V574.

The Anti-Lock Brake System (ABS) module may leak brake fluid internally and cause an electrical short, which can result in an engine compartment fire while parked or driving.

**Consequence :** An engine compartment fire while parked or driving can increase the risk of injury.

**Remedy :** Owners are advised to park outside and away from structures until the recall repair is complete. Dealers will replace the ABS fuse, free of charge.
